Cheniere Celebrates 10 Years of LNG Exports

HOUSTON--(BUSINESS WIRE)-- Cheniere Energy, Inc. ("Cheniere") (NYSE: LNG) today celebrates the 10th anniversary of its first export cargo of liquefied natural gas ("LNG").

On February 24, 2016, Cheniere loaded the *Asia Vision* with LNG produced at its Sabine Pass Liquefaction terminal in Cameron Parish, Louisiana. The Cheniere-chartered vessel departed the terminal at 7:25 p.m. local time, ushering in a new era for Cheniere, as well as for domestic and global energy markets, marking the first commercial LNG cargo exported from the U.S. lower 48 states.

Today, Cheniere is the largest producer of LNG in the U.S. and a global energy leader that is growing to help meet the world's ever-increasing energy demand. The U.S. has since emerged as the world's top LNG supplier.

"A decade ago, we started something transformative – producing and exporting LNG at scale from the U.S. Gulf Coast," said Jack Fusco, Cheniere's President and CEO. "Ten years and nearly 5,000 cargoes later, we continue to lead the way, and our commitment to safety, our people, customers and communities is stronger than ever."

Cheniere has committed more than \$50 billion to build and expand its two Gulf Coast liquefaction terminals. These facilities today deliver a combined LNG production capacity of over 50 million tonnes per annum ("mtpa") which is expected to grow to over 60 mtpa by late 2028, with line of sight to reach approximately 75 mtpa by 2030 and potentially over 100 mtpa by the mid-2030s.

Cheniere's LNG has reached more than 40 markets worldwide, helping countries and customers drive progress and realize the benefits of U.S. LNG by improving access to secure, reliable and affordable energy.

"I am immensely proud to lead the company that pioneered the modern era of U.S. LNG exports, enabling abundant American energy to reach global markets while providing customers with unprecedented flexibility to manage their energy supplies," Fusco said. "Our success is made possible by the unwavering commitment of our dedicated workforce across Louisiana and Texas as well as around the world, and the support of our customers, EPC provider Bechtel, regulatory agencies, financial stakeholders and our community partners.

"We have accomplished so much in 10 years – and we are just getting started."

About Cheniere

Cheniere Energy, Inc. is the leading producer and exporter of LNG in the United States, reliably providing a clean, secure, and affordable solution to the growing global need for

natural gas. Cheniere is a full-service LNG provider, with capabilities that include gas procurement and transportation, liquefaction, vessel chartering, and LNG delivery. Cheniere has one of the largest liquefaction platforms in the world, consisting of the Sabine Pass liquefaction facility, wholly-owned by its subsidiary Cheniere Energy Partners, L.P. (NYSE: CQP), and the Corpus Christi liquefaction facility, each on the U.S. Gulf Coast with total combined production capacity of approximately 52 mtpa of LNG in operation and an additional over 9 mtpa of expected production capacity under construction or in commissioning, inclusive of estimated debottlenecking opportunities. Cheniere is also pursuing liquefaction expansion opportunities and other projects along the LNG value chain. Cheniere is headquartered in Houston, Texas, and has additional offices in London, Singapore, Beijing, Tokyo, Dubai and Washington, D.C.

Forward-Looking Statements

This press release contains certain statements that may include “forward-looking statements” within the meanings of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical or present facts or conditions, included herein are “forward-looking statements.” Included among “forward-looking statements” are, among other things, (i) statements regarding Cheniere’s financial and operational guidance, business strategy, plans and objectives, including the development, construction and operation of liquefaction facilities, (ii) statements regarding regulatory authorization and approval expectations, (iii) statements expressing beliefs and expectations regarding the development of Cheniere’s LNG terminal and pipeline businesses, including liquefaction facilities, (iv) statements regarding the business operations and prospects of third-parties, (v) statements regarding potential financing arrangements, (vi) statements regarding future discussions and entry into contracts, (vii) statements relating to Cheniere’s capital deployment, including intent, ability, extent, and timing of capital expenditures, debt repayment, dividends, share repurchases and execution on the capital allocation plan and (viii) statements relating to our goals, commitments and strategies in relation to environmental matters. Although Cheniere believes that the expectations reflected in these forward-looking statements are reasonable, they do involve assumptions, risks and uncertainties, and these expectations may prove to be incorrect. Cheniere’s actual results could differ materially from those anticipated in these forward-looking statements as a result of a variety of factors, including those discussed in Cheniere’s periodic reports that are filed with and available from the Securities and Exchange Commission. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this press release. Other than as required under the securities laws, Cheniere does not assume a duty to update these forward-looking statements.
