CEI debt balance (unconsolidated)	No debt	No debt	~\$2 billion	~\$2 billion	~\$4 billion

Note: EBITDA is a non-GAAP measure. EBITDA is computed as total revenues less non-cash deferred revenues, operating expenses, assumed commissioning costs and state and local taxes. It does not include depreciation expenses and certain non-operating items. Because we have not forecasted depreciation expense and non-operating items, we have not made any forecast of net income, which would be the most directly comparable financial measure under generally accepted accounting principles, or GAAP, and we are unable to reconcile differences between forecasts of EBITDA and net income. EBITDA has limitations as an analytical tool and should not be considered in isolation or in lieu of an analysis of our results as reported under GAAP, and should be evaluated only on a supplementary basis.

19 (1) Assumes 4.0 MTPA sold at \$3.50/MMBtu on Train 6 and split evenly across long term and short / medium term sales.

Potential Financial Profile of CEI

Cheniere development of ~41 MTPA of US liquefaction capacity (9 trains) leads to

- EBITDA of \$3.3 - \$4.5 billion (unconsolidated)
- CEI level debt of ~\$4 billion (unconsolidated)
- CEI share count of 268 million⁽¹⁾

(1) As of January 2014, 238.1 million shares outstanding, plus 30 million CEI shares under proposed 2014 - 2018 management compensation plan.

Note: EBITDA is a non-GAAP measure. EBITDA is computed as total revenues less non-cash deferred revenues, operating expenses, assumed commissioning costs and state and local taxes. It does not include depreciation expenses and certain non-operating items. Because we have not forecasted depreciation expense and non-operating items, we have not made any forecast of net income, which would be the most directly comparable financial measure under generally accepted accounting principles, or GAAP, and we are unable to reconcile differences between forecasts of EBITDA and net income. EBITDA has limitations as an analytical tool and should not be considered in isolation or in lieu of an analysis of our results as reported under GAAP, and should be evaluated only on a supplementary basis.

Estimates represent a summary of internal forecasts, are based on current assumptions and are subject to change. Actual performance may differ materially from, and there is no plan to update, the forecast. See "Forward Looking Statements" slide.

(1) Includes export fees.

Conversion of Class B and Subordinated Units

Class B Units:

- **Mandatory conversion:** within 90 days of the substantial completion of Train 3
- **Optional conversion by a Class B unitholder** may occur at any of the following times:
 - After 83 months from issuance of EPC notice to proceed
 - Prior to the record date for a quarter in which sufficient cash from operating surplus is generated to distribute \$0.425 to all outstanding common units and the common units to be issued upon conversion
 - Thirty (30) days prior to the mandatory conversion date
 - Within a 30-day period prior to a significant event or a dissolution

Subordinated Units:

- Subordinated units will convert into common units on a one-for-one basis, provided that there are no cumulative common unit arrearages, and either of the below distribution hurdles is met:
 - For three consecutive, non-overlapping four-quarter periods, the distribution paid from “Adjusted Operating Surplus”⁽¹⁾ to all outstanding units⁽²⁾ equals or exceeds \$0.425 per quarter
 - For four consecutive quarters, the distribution paid from “Contracted Adjusted Operating Surplus”⁽¹⁾ to all outstanding units⁽²⁾ equals or exceeds \$0.638 per quarter

(1) As defined in CQP's partnership agreement.

(2) Includes all outstanding common units (assuming conversion of all Class B units), subordinated units and any other outstanding units that are senior or equal in right of distribution to the subordinated units.
