SUMMARY AND REVIEW OF FINANCIAL RESULTS

(in millions, except LNG data)

| | Three Months Ended March 31, | | |
|---|------------------------------|----------|-----------|
| | 2023 | 2022 | % Change |
| Revenues | \$ 7,310 | \$ 7,484 | (2) % |
| Net income (loss) ¹ | \$ 5,434 | \$ (865) | <i>nm</i> |
| Consolidated Adjusted EBITDA ² | \$ 3,599 | \$ 3,153 | 14 % |
| LNG exported: | | | |
| Number of cargoes | 167 | 160 | 4 % |
| Volumes (TBtu) | 603 | 584 | 3 % |
| LNG volumes loaded (TBtu) | 602 | 585 | 3 % |

Net income (loss) was approximately \$5.4 billion for the three months ended March 31, 2023 as compared to approximately \$(865) million in the corresponding 2022 period. The favorable change was primarily due to changes in fair value of our derivative portfolio (further described below) of approximately \$4.7 billion (before tax and non-controlling interests) as compared to the \$(3.4) billion of changes in fair value in the prior period, as well as increased total margins per MMBtu of LNG delivered. The favorable changes were partially offset by a higher provision for income tax in the current period as well as a higher contribution to noncontrolling interests.

Consolidated Adjusted EBITDA increased approximately \$446 million for the three months ended March 31, 2023 as compared to the three months ended March 31, 2022. The increase was due primarily to increased total margins per MMBtu of LNG delivered and a higher contribution from certain portfolio optimization activities, partially offset by lower volumes sold into short-term markets.

Substantially all derivative gains (losses) relate to the use of commodity derivative instruments indexed to international gas and LNG prices, primarily related to our long-term Integrated Production Marketing ("IPM") agreements. Our IPM agreements are designed to provide stable margins on purchases of natural gas and sales of LNG over the life of the agreements and have a fixed fee component, similar to that of LNG sold under our long-term, fixed fee LNG SPAs. However, the long-term duration and international price basis of our IPM agreements make them particularly susceptible to fluctuations in fair market value from period to period. In addition, accounting requirements prescribe recognition of these long-term gas supply agreements at fair value, but do not currently permit fair value recognition of the associated sale of LNG, resulting in a mismatch of accounting recognition for the purchase of natural gas and sale of LNG. As a result of the significant volatility in forward international gas and LNG price curves during the three months ended March 31, 2023, we recognized \$4.0 billion of non-cash favorable changes in fair value attributable to such positions (before tax and non-controlling interests).

Share-based compensation expenses included in net income (loss) totaled \$49 million for the three months ended March 31, 2023, compared to \$43 million for the three months ended March 31, 2022.

Our financial results are reported on a consolidated basis. Our ownership interest in Cheniere Partners as of March 31, 2023 consisted of 100% ownership of the general partner and a 48.6% limited partner interest.

(1) Change in fair value of commodity and FX derivatives prior to contractual delivery or termination

Consolidated Adjusted EBITDA is commonly used as a supplemental financial measure by our management and external users of our Consolidated Financial Statements to assess the financial performance of our assets without regard to financing methods, capital structures, or historical cost basis. Consolidated Adjusted EBITDA is not intended to represent cash flows from operations or net income (loss) as defined by U.S. GAAP and is not necessarily comparable to similarly titled measures reported by other companies.

We believe Consolidated Adjusted EBITDA provides relevant and useful information to management, investors and other users of our financial information in evaluating the effectiveness of our operating performance in a manner that is consistent with management's evaluation of financial and operating performance.

Consolidated Adjusted EBITDA is calculated by taking net income (loss) attributable to common stockholders before net income (loss) attributable to non-controlling interest, interest expense, net of capitalized interest, changes in the fair value and settlement of our interest rate derivatives, taxes, depreciation and amortization, and adjusting for the effects of certain non-cash items, other non-operating income or expense items, and other items not otherwise predictive or indicative of ongoing operating performance, including the effects of modification or extinguishment of debt, impairment expense and loss on disposal of assets, changes in the fair value of our commodity and FX derivatives prior to contractual delivery or termination, and non-cash compensation expense. The change in fair value of commodity and FX derivatives is considered in determining Consolidated Adjusted EBITDA given that the timing of recognizing gains and losses on these derivative contracts differs from the recognition of the related item economically hedged. We believe the exclusion of these items enables investors and other users of our financial information to assess our sequential and year-over-year performance and operating trends on a more comparable basis and is consistent with management's own evaluation of performance.

Distributable Cash Flow is defined as cash generated from the operations of Cheniere and its subsidiaries and adjusted for non-controlling interest. The Distributable Cash Flow of Cheniere's subsidiaries is calculated by taking the subsidiaries' EBITDA less interest expense, net of capitalized interest, interest rate derivatives, taxes, maintenance capital expenditures and other non-operating income or expense items, and adjusting for the effect of certain non-cash items and other items not otherwise predictive or indicative of ongoing operating performance, including the effects of modification or extinguishment of debt, amortization of debt issue costs, premiums or discounts, changes in fair value of interest rate derivatives, impairment of equity method investment and deferred taxes. Cheniere's Distributable Cash Flow includes 100% of the Distributable Cash Flow of Cheniere's wholly-owned subsidiaries. For subsidiaries with non-controlling investors, our share of Distributable Cash Flow is calculated as the Distributable Cash Flow of the subsidiary reduced by the economic interest of the non-controlling investors as if 100% of the Distributable Cash Flow were distributed in order to reflect our ownership interests and our incentive distribution rights, if applicable. The Distributable Cash Flow attributable to non-controlling interest is calculated in the same method as Distributions to non-controlling interest as presented on our Consolidated Statements of Stockholders' Equity in our Forms 10-Q and Forms 10-K filed with the Securities and Exchange Commission. This amount may differ from the actual distributions paid to non-controlling investors by the subsidiary for a particular period.

We believe Distributable Cash Flow is a useful performance measure for management, investors and other users of our financial information to evaluate our performance and to measure and estimate the ability of our assets to generate cash earnings after servicing our debt, paying cash taxes and expending sustaining capital, that could be used for discretionary purposes such as common stock dividends, stock repurchases, retirement of debt, or expansion capital expenditures. Distributable Cash Flow is not intended to represent cash flows from operations or net income (loss) as defined by U.S. GAAP and is not necessarily comparable to similarly titled measures reported by other companies.
